Tel no.	01379 872146	

Overview (max 250 words)

Brown and May Marine Ltd were commissioned by CNR international to undertake a Socioeconomic Impact Assessment (SclA) in relation to the Decommissioning of the Ninian Northern Platform and associated infrastructure located in the Northern North Sea.

Challenge (max 250 words)

High levels of commercial fishing activity by the UK and a number of international fleets that represented a diverse range of both static and towed gear types represented a complication.

Solution (max 250 words)

In depth consultation with relevant commercial fisheries stakeholders, across all fleet sectors, was undertaken by collaborating SFF (Scottish Fisherman's Federation), in addition to fisheries statistics, satellite tracking and surveillance data.

Results (max 250 words)

An accurate assessment of the potential socioeconomic impacts was undertaken in a timely and cost-effective manner.
