### Overview (max 250 words)

Acteon had the task of planning and executing the installation of a new umbilical, termination assembly, electrical distribution unit (EDU) and electronic flying leads (EFL) for Chevron's Kuito field in Angola.

### Challenge (max 250 words)

Limited crane capacity, reduced space and visibility.

### Solution (max 250 words)

Three-phase approach was implemented.

### Results (max 250 words)

Using the expertise, technical ability and proactive approach of InterMoor and Aquatic (Acteon FLS group companies), the project was completed 20% ahead of time, with less than 10% downtime.
