Overview (max 250 words)

Endeavour International Corporation awarded Bibby Offshore UK Limited (BOUK) the contract for the Renee and Rubie Decommissioning Project. Bibby Offshore Limited conducted these works in 3 phases using ROVSV EDT Jane, DSV Bibby Sapphire and CSV Olympic Ares. The Renee and Rubie fields are located in Block 15/27a and 15/28b of the Central North Sea in an area of approximately 113-150m water depth. The fields were developed in 1999 and tied into the AH001 floating production facility.

Results (max 250 words)

Side Scan Sonar Survey, Sub Bottom Profiling, pipeline and mattress surveys were performed in preparation of the CSV and DSV phases. The DSV / CSV Recovery Phase included subsea preparation works to ensure the safe and efficient recovery of the Renee Production Manifold, Cross-Over Structure, 2.5km of Rigid Flowlines, Control Umbilicals, Concrete Mattresses and general debris. All materials were offloaded at Peterhead Harbour for recycling and disposal.
