# Trust, Reliability, Experience

# Decommissioning Lifecycle

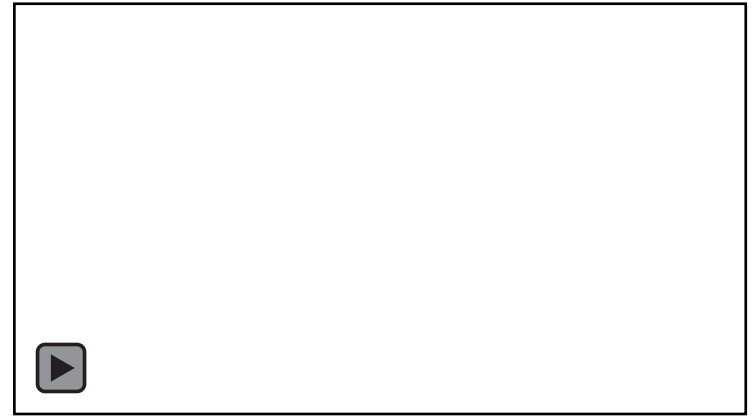

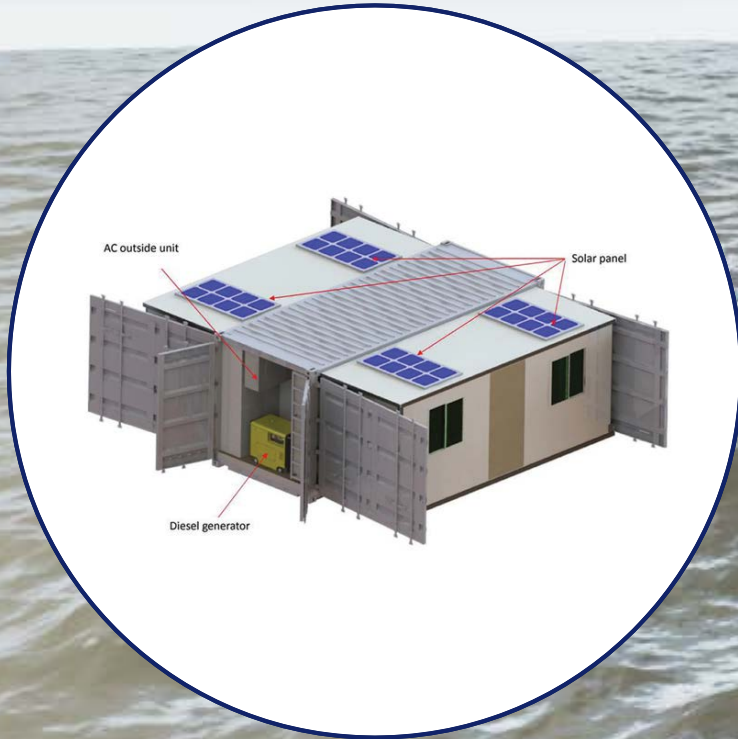

# Late life operations

Main activity *Reduce maintenance OPEX / stimulate production*

Main challenge *Reduce facility complexity*

- Provision of temporary utilities across gangway (HVAC, fuel, power, water)
- Reactive support & proven in harsh weather (4m H<sub>s</sub>)
- Cost effective over fixed rig support offering

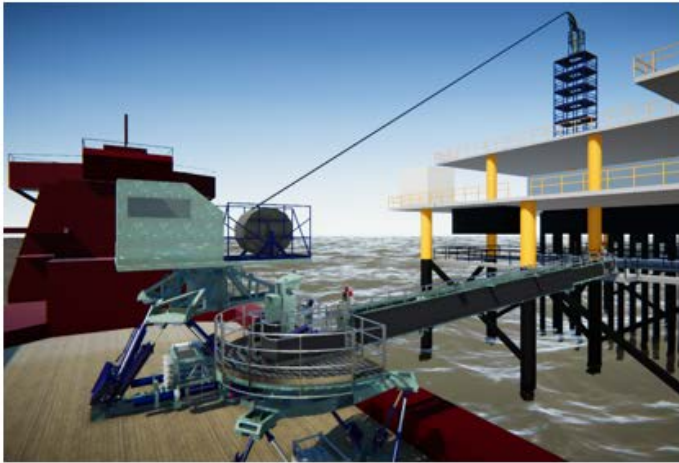

# Shutting down & Decontamination – Well P&A

Main activity

*Well intervention and P&A*

Main challenge

*Cost of service; reduce rig time*

- Vessel based CT and Wireline; Data logging, Well cleaning cement plug installation

# Suspension

Main activity

*Prepare for removal phase*

Main challenge

*Maintain structural integrity & provide utility support*

- Cherry picker for IRM
- Gangway for utility support. Reduces need for fixed rig support

# Heavy lifting & Transport

Main activity

*Final Cut, lift and transport topside and jacket*

Main challenge

*Minimal time on site, reduce risk*

- Gangway for post final cut egress
