

JACKET REMOVALS 2017

ASSET TYPE	jackets
LOCATION	GoM, Brunei, UKCS, Nigeria
PROJECT	Comparative Assessments and Cost Study

Ardent have been engaged to undertake a study into the veracious techniques for jacket and sub-structure removal for a global operator. A comparative assessment review, with emphasis on alternatives to heavy lifting , and associated cost will be the output. Key considerations encompass safety, water depth, regulatory regimes, technology maturity, environmental and metrology aspects, asset integrity , disposal options , weights , dimensions and localized supply chain availability.
