

A Solutions Based Approach To Equipment Rental For Decommissioning Applications

Andy Buchan, Managing Director

Company Introduction

Available at www.hiretech.eu

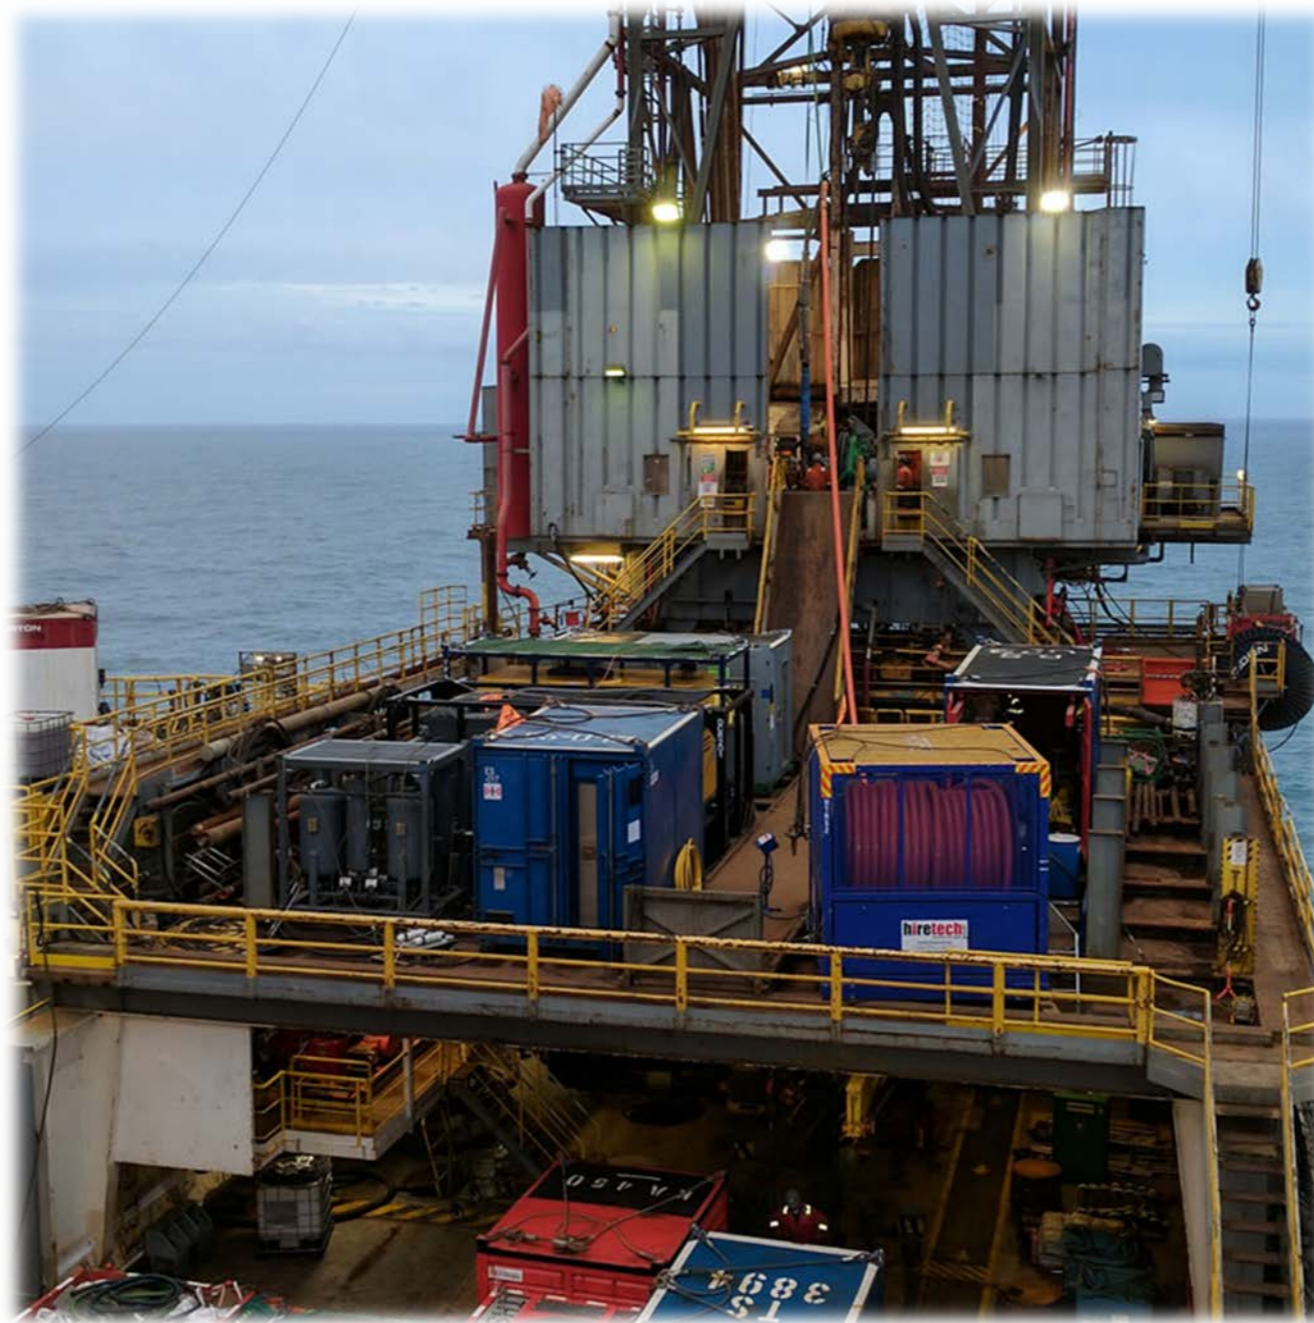

Decommissioning Applications

- **Centrifugal Pumps**
Flushing and cleaning redundant pipework
- **Positive Displacement Pumps**
Cementing, abrasive cutting, coatings removal, caisson excavation
- **Powered Umbilical Reels**
P&A project support - laser, hydraulic and abrasive cutting scopes
Deploying downlines for flushing subsea pipelines
- **Hydraulic Power Packs**
Supporting P&A, diamond wire, drill and pin operations

Case Study – Supporting Downhole Laser Cutting Package

Standard product redesign and modification to meet client requirements

Powered Umbilical Reels, HPU's, Overboard Chutes

Case Study - Solids Recovery System

Handling solids generated through pipeline and well clean up

Case Study – Cleaning, Flushing, Decontaminating

Centrifugal Pumps, Umbilical Reels, Hoses

Case Study - Prototype Testing Support

Facilities to test abandonment technologies and techniques

Case Study - Prototype Testing Support

Downhole tool testing

Positive Displacement Pumps
