Offshore Petroleum Regulator for Environment & Decommissioning

### The scale of the decommissioning challenge – where are we now?

- Decommissioning programme is required before execution can take place
- Decommissioning projects "under discussion" (OPRED)
- Cessation of Production dates (OGA)
- Decommissioning is increasing
- Approvals do not reflect estimates
- 2019 remains a potential "peak" year

Offshore Petroleum Regulator for Environment & Decommissioning

# Reflections

Offshore Petroleum Regulator for Environment & Decommissioning Is deferral of decommissioning a good or bad thing?

Supply chain needs/wants/would benefit from certainty, but is this realistic?

"Well p&a is/isn't happening on the scale we anticipated"

Different views on port capacity, and the significance of this

Operator appetite for moving from an exploration company to a decommissioning company

## Final thoughts.....

- Government is keen to see decommissioning costs meet the £39bn target
- Is culture change happening at the pace that is needed?
- What are you doing to minimise the cost of decommissioning?
- What more needs to be done?
