

ZERO WASTE TO LANDFILL

ASCOWORLD.COM

REDUCE - REUSE - RECYCLE - RECOVER

ASCO have been working hard with our clients to sustainably develop our onshore waste management options to meet the specific requirements of the offshore industry sector where we operate.

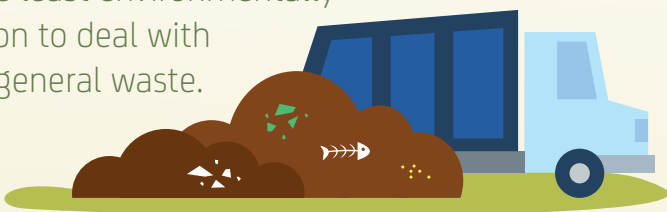

Despite the Scottish government's relaxation of the landfill ban to 2025, **ASCO has continued to develop the solutions and have achieved our goal of introducing a zero to landfill option for offshore derived waste in 2020.**

Read on to find out more.

The Issue

Landfill is the least environmentally friendly option to deal with non-special general waste.

In 2019, our oil and gas customers sent **6,000 Tonnes** to landfill.

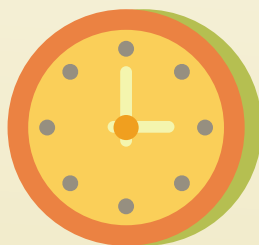

The Objective

We want to help our customers achieve "Zero to Landfill" for general waste well ahead of the Scottish Government's pledge to do this by 2025.

Why wait?

ASCO can help you achieve this goal in now.

How do we achieve zero waste to landfill?

ASCO are collaborating with the local supply chain to develop a solution for the **complete removal** of general waste to landfill.

Why do we need to achieve zero waste to landfill?

- To meet the targets set out in the Waste (Scotland) Regulations 2012.
- To reduce the environmental impact of your operations.
- To raise awareness to help reduce waste.
- To support the local industry.

OK, I'm in. What do I do next?

Please contact:
Your **ASCO Waste focal point** or **Simon.Turner@ascoworld.com** for more details about how you can get involved.
