

## Safe disposal of waste from BP's North West Hutton decommissioning project gets underway

**Enviroco has begun the receipt of approximately 700 tonnes of waste, from the decommissioning of the North West Hutton sub-sea structures.**

below sea structure

The North West Hutton field – which ceased oil production in 2002 – is located in the North Sea, 130km north-east of the Shetland Islands. Work on such a large scale project can only commence after extensive consultation with government bodies, to arrange the safe recycling and disposal of any resulting waste. BP selected Enviroco as the sole waste management contractor, to take responsibility for the offloading, transportation, processing and recycling of the returned waste materials.

The onshore receipt of waste umbilicals, pipelines and concrete mattresses from the North West Hutton field is underway in Montrose and in Lerwick in the Shetland Islands,

with further waste due to arrive in 2013. When the materials arrive at the quayside, Enviroco takes over and moves the waste to its specialist disposal and recycling facilities. Some larger structures require specialist environmental and safety planning, with transport of these loads taking place alongside a police escort.

Julian Foley, Enviroco's Operations Director commented: "This was a challenging project, which required us to be prepared to provide our normal high standards of service at short notice, across a number of potential locations. Needless to say, we rose to the challenge! We're now looking forward to completing the North West Hutton project, and moving onto activities in the Don Field in 2013."

# who we are

Enviroco are one of the leading waste management companies in the UK, with increasing worldwide capabilities.

## **What makes us different?**

We provide innovative waste management solutions differentiated on customer service excellence, delivering value with unrivalled safety and environmental focus.

## **We can offer:**

- Total waste management
- Oil & Gas services
- Industrial cleaning and ancillary services
- Hazardous waste collection, treatment and disposal
- Innovative recycling solutions
- UK wide collection
- Mobile chemist services (Hazpak)
- Training and advice

## **Exceed.**

Don't think of us as just another waste contractor. Our long-term relationships with our customers are developed on the basis of trust and mutual benefit. We achieve this because we exceed expectations, adding value at every opportunity.

## **Assurance.**

Enviroco management systems are accredited to ISO 9001, ISO 14001 and OHSAS 18001 international standards. Our highly progressive HSEQ management system underpins all that we do and customers are assured of a safe, secure and compliant service.

## **Why use us?**

Well, because we really are different. Our approach to health, safety and the environment is un-wavering. We have a lot of experience, are fully accredited to recognised international standards, and we listen to you to ensure we give you what you want.
