

L2P2 Launch

Pamela Ogilvie
L2P2 Project Manager

So What is a Tool?

A process, procedure, guidance or information that will enable the user to deliver well considered, value driven solutions to late life and decommissioning activities.

- Anyone can access the portal and submit tools
- In a Standardized Format
 - Describes the tool, how it works and may include a template
- Quality is evaluated and assured via the Governance Process

Governance Process

- Workstream Champions
- Steering Committee
- DNS Team
- Audit Committee

Workstream Champions

- Portal Gatekeepers
- Review and approve tools, case studies, lessons learned

Steering Committee

- Interface between workstream champions, DNS team and Audit team
- Provide guidance and oversight management

DNS Team

- Publishing entity for tools, case studies and lessons
- Maintain and archive minutes of meetings

Audit Committee

- Regular review of inputs, advise steering committee
- Identify gaps areas or priority

...the possibilities are limitless...

- We have created a toolbox
- It needs quality tools to align with our vision of providing a single source of tools and guidance for decommissioning professionals

“To provide an Industry Standard for Late Life and Decommissioning Planning”
