

An aerial photograph of an industrial facility, likely an oil or gas processing plant. The image shows a complex network of metal structures, pipes, and walkways. In the center, three workers wearing blue safety suits and green hard hats are standing on a metal platform. The background is filled with various industrial components, including large pipes and structural beams. The overall scene is one of a busy, large-scale industrial operation.

# Exporting....

- Lessons learned and experience gained in the North Sea, including:
  - The adoption and export of the OEUK WBS
  - Processes, procedures, services
  - Focus on safety and assurance
- Integrating decommissioning services with global and local supply chain and enhancing capability

**EACH EXPORT  
OPPORTUNITY PROVIDES  
LEARNING**

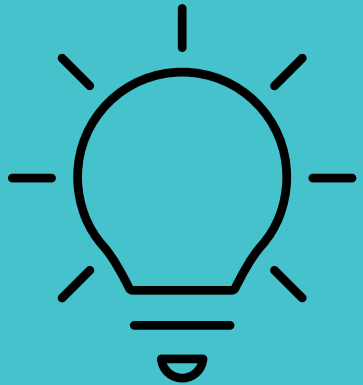

# Importing....

- Flexible, fair, transparent, innovative ways of working that are mutually beneficial
- Perspective on shared value
- Understanding and knowledge of regulatory bodies around the world
- Transfer working practice cross region driving continuous improvement
- Global supply chain relationships
- BUT TOP OF THE LIST....

**NOT JUST TALKING  
ABOUT COLLABORATION,  
BUT DOING IT**

# TRANSPARENCY

...and sharing risk

# UNDERSTANDING CRITICAL DRIVERS

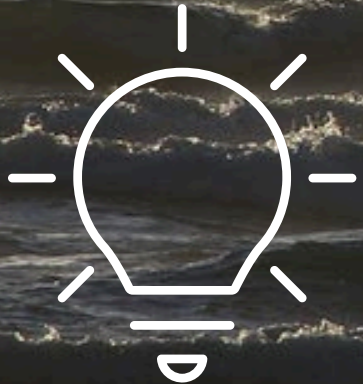

NORTHERN  
ENDEAVOUR

Petrofac 

# FOCUSING ON CAPABILITY & INNOVATION

...cost takes care of itself

# FOR YOUR CONSIDERATION

If we focus on:

- Transparency
- Core capability
- Developing a mutual understanding of risk

Would that improve alignment, collaboration, and effectiveness in decommissioning?
