# ASCO carries out Waste Training and Consultancy for Total

**DELIVERING WASTE AWARENESS TO ENSURE ADHERENCE TO RESPONSIBILITIES, POLICIES AND PROCEDURES**

## THE NEED

Total required a third party with waste management expertise to complete offshore audits and training to confirm their internal processes were being followed.

## THE SOLUTION

ASCO carried out a complete duty of care audit on Total's waste management procedure and provided simple offshore waste awareness training.

## THE BENEFITS

- Onshore and offshore waste audits to ensure compliance and regulatory requirements were met
- Areas for improvement and of non-compliance with relevant regulations identification
- Our team is certified to deliver Chartered Institute of Waste Management (CIWM) Waste Smart courses which keep you up to date with current legislation and best practice in a rapidly changing industry
- Training courses can be delivered both on and offshore by our experienced waste management in-house team
- Consultative process with the client
- Client's compliance improvement which can help maintain the ISO 14001 certification.

## OVERVIEW

Total have a rigorous internal audit system but required a third party with waste management expertise to complete offshore audits and training to confirm that their internal processes were being followed.

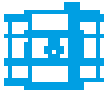

### Scope of work

ASCO were required to complete a duty of care audit on Total's waste management procedure and provide simple offshore waste awareness training to their staff in order to verify Total's compliance with their own waste procedures, and any applicable legislation.

## A CONSULTATIVE PROCESS THROUGH AUDITING AND TRAINING

ASCO sent one of their multiskilled waste team offshore to complete both the audit and the training. The audit includes meetings with key stakeholders on the asset, external review of waste signage, storage and segregation, paperwork and document review as well as a review on all waste data and identifies areas of improvement or opportunities to improve waste segregation. Two members of our team are skilled waste awareness trainers who have the capability to offer this training both on and offshore. The training objectives cover waste definition and duty of care, environmental impact of waste, waste segregation, storage

WASTE

and packaging, completion of waste notes, and company specific waste procedures.

### **SUCCESSFUL EXECUTION FROM A MULTISKILLED TEAM**

Various findings were noted from the audit and a report issued to key stakeholders. This helps maintain Total's legal responsibilities and ensures adherence to internal policies and procedures.
